Week 2 Meeting, Team 2 Minutes

Saturday, January 27, 2024   12:49 PM

Group meeting overview:

The required meeting for Week 2 occurred on January the 31th, 2024 from 2:30 PM to 3:30 PM Before the ECE 4961 lecture session. During the meeting, the group aimed to discuss our thoughts on our assigned project, look into the project proposal on Github, and discuss what we needed to move forward with the project kickoff meetings.

Attendance:

There was full team attendance during this meeting, and communication was maintained throughout the course of the meeting so that all members of the group had an equal say in group decisions.

Updates:

Since our meeting in week 1, Professor Roberts assigned the Devcom project to Team 2.

Notes:

The team worked together and established some 'base' ideas concerning the Devcom project. Some ideas that were discussed around the table were possible ways to deflect the golf ball such as compressed air, pellet type projectiles, pressurized water, and a hackey sack/potato gun. Tracking was also a thought that concerned the team and before digging in to deep into the subject a decision was made to wait to meet with Professor Roberts to try and get a better picture of the needs/requirements for the tracking system. It should be noted here that after this meeting, the team talked to Professor Roberts after the ECE 4961 lecture and found that Devcom has some sort of book of requirements and guidelines that will greatly aid us in the specs our design should be made to fit within. The team also reviewed and lightly discussed the Project Proposal during the meeting. The team also deemed to wait till after speaking with Professor Robert in order to see how to properly contact Devcom and set up a meeting with them.

Planned Tasks going forward:

Going forward, each member was asked to monitor the Teams chat for any updates as well as to be brainstorming on new ideas to propose to the group for the Project during the next team meeting the following week, as well as write an email introducing ourselves to the Devcom customer.

Takeaways/Quick Bullet points:
- Brainstorm ideas for Project Proposal
- Brainstorm ideas for possible Project solutions`
- Write an email to the Devcom customer
